

Sustainable yield and liquidity generation protocol for kids in need

“Enrich yourself while Enriching a Kid” “Every kid deserves to be a Success Kid”

Success Kid Vision

Success Kid (SKIDDO) aim to work towards a world where every child is free to live at their fullest potential, no matter where they are from or what challenges they face.

None of us chooses where we are born.

None of us chooses to be born in extreme poverty – including the nearly 400 million of the world’s children who live in the world’s poorest places, where they are deprived of their basic rights and necessities, excluded from opportunity and vulnerable to harm.

400 million is an awfully big number, too big to tackle. No one person can save that many.

But what if you could help one child? Now with Block Chain and the explosion of Defi the outreach can be magnified a thousand if not thousands time.

Through Success Kid (SKIDDO), you can. Enrich yourself while enriching a kid. Every Kid deserves to be a Success Kid

Success Kid Mission

Help children living in poverty to have the capacity to improve their lives and the opportunity to bring lasting change to their communities.

PROMOTE societies that value, protect and advance the well-being and rights of children.

ENRICH yourself financially and at the same time enriching the lives of children by supporting our cause.

Success Kid Approach

Success Kid (SKIDDO) is the first project of such that creates an ecosystem underpinned by sustainable yield and liquidity generation protocol to generate sustainable charity donations to underprivileged kids around the world.

Sustainable yield and liquidity generation protocol works by applying 10% fee for each transaction and instantly splitting that fee by rewarding holders with 5%, auto locking 5% in Pancake LP and 10% of total supply in charity reserve wallet. Contract allows to exclude certain addresses like PancakeSwap contract address from receiving rewards, as well as allows to include certain address to receive reward if required.

Sustainability in both yield and liquidity generation – With the explosion of Defi many new cryptocurrencies with strong project fundamentals and ideologies have their value diminished over time by high APY LP-Farming Trap, they are forced to be pushed out by buyers with higher staking rewards leading to inevitable valuation bubble, which is then followed by the pump and then the impending collapse of the token price. Success Kid (SKIDDO) aim to eradicate the toxicity caused by farming rewards by introducing three key features: ***Static Rewards, Manual Burn and Automatic Liquidity Provision***. Together these key features aim to create a sustainable rewarding ecosystem for holders of (SKIDDO) and ultimately translating to sustainable charity donations to underprivileged kids around the world.

Static Rewards – Success Kid (SKIDDO) seeks to build upon the concept of static rewards. Static rewards solve a host of problems. First, the reward amount is conditional upon the volume of the token been traded. Static rewards aim to minimize the downward sell pressure on the token caused by earlier buyers off-loading their tokens after farming sky high APY's. Second, the reflect feature rewards holders to hold their tokens to be rewarded with more tokens which are based upon a % carried out and dependent upon the total number of tokens the owner holds. Hypothetically, with the manual burn feature and a controlled declining supply, even a small holder at the beginning could walk away with big money at the end of the token's lifespan. For every transaction this translates to a certain % of the transaction fees earmarked in a charity reserve wallet to be distributed to underprivileged kids around the world via organizations voted by the community.

Manual Burn – We recognized the importance of burns in relation to both the intrinsic and extrinsic value of a token. Success Kid (SKIDDO) takes a pragmatic approach to burns, with the long-term interest of both holders and charitable beneficiaries in mind. A continuous burn on any one protocol can be great from the starting days, having said that, this implies the burn cannot be controlled in any way. Burns of (SKIDDO) are controlled by the team and the voting of community. This is to keep the both the community and charitable beneficiaries rewarded and informed. The conditions and amounts of the manual burns will be published and tracked on Success Kid (SKIDDO) official website, telegram, twitter and discord channels.

Automatic Liquidity Provision – Automatic Liquidity Provision underlies the mechanics of Success Kid (SKIDDO). This function acts as a two-prong beneficial implementation for both holders and charitable beneficiaries. First the smart contract assimilates tokens from both buyers and sellers by adding them to the Liquidity Pool therefore creating a strong base price. Second the tax in place acts as a natural arbitrage mechanism that secures the volume of (SKIDDO) as a reward for both holders and charitable beneficiaries. Hypothetically, the additional Liquidity Pool creates a stability from the supplied Liquidity Provision by adding the tax to the overall liquidity of (SKIDDO), thus increasing the tokens overall Liquidity Provision and further provides support to the base price of the token. Over time as the (SKIDDO) token Liquidity Provision increases, the price stability mirrors this function with the benefits of a strong base price providing a cushioning effect for holders. This will prevent large fluctuations especially dips when the whales decides to sell their tokens in the later stage. With this methodology Success Kid (SKIDDO) will alleviate the current toxicities that are present with the current Defi reflection tokens. Our team sees our model and protocol as the new benchmark over the outdated reflection tokens.

Charity Reserve Wallet – As the smart contact and protocol works by applying 10% fee for each transaction and instantly splitting that fee by rewarding holders with 5%, auto locking 5% in Pancake LP and 10% of total supply in charity reserve wallet. The 5% reward based on the 10% of total supply will be allotted to the charity reserve wallet throughout the token’s lifespan will be distributed to charitable organizations where the beneficiaries are specifically underprivileged kids around the world. The Success Kid (SKIDDO) community will collectively vote and decide

on a monthly basis how and which charitable organizations the charity reserve wallet will be distributed to. Upon launch, a team of 4 members from the community will be invited to overlook the mechanics, discussions on charity drives and suggestions on how to better improve and strengthen the process. All charity related discussions and transactions will be published in a transparent fashion over the Success Kid (SKIDDO) official website, telegram, twitter and discord channels.

Tokenomics

SYMBOL	SKIDDO
TOTAL SUPPLY	1,000,000,000,000,000
BLACK HOLE BURN	250,000,000,000,000 (25% of total supply)
PANCAKE SWAP LP	250,000,000,000,000 (25% of total supply)*
PRESALE ALLOCATION	300,000,000,000,000 (30% of total supply)*
RESERVE	100,000,000,000,000 (10% of total supply)***
CHARITY RESERVE WALLET	100,000,000,000,000 (10% of total supply)

Charity Reserve Wallet Address `0x1f18f5e35328997478fe9eb0d985Da9e7Ad390cF`

10% fee applied to each transaction and instantly splitting fee 5% to holders including the Charity Reserve Wallet, 5% to PancakeSwap LP

**collected funds from presale will be locked in Pancake Swap for 3 years*

**remaining tokens after presale will be burned or allocated to charity reserve wallet, community will decide*

***reserve wallet will be used to cover marketing, exchange listing, team expansion costs, etc.*

Roadmap

Q2 2021

Contract Deployment

Presales

Pancake Swap Listing

CoinGecko

CoinMarketcap

Q3 2021

Website Improvement

**Hiring of 4 Team Members
from community for Charity
Reserve Wallet Operations**

Marketing and Listing

Q4 2021

Multiple Exchanges Listing

Partnerships

NFT Marketplace and Staking
